AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

1.   (Currently Amended) A method comprising:

providing a first computer system including bookmarks;

providing a second computer system including a search engine;

providing a ~~search term to the search engine~~ user computer system, each of the computer systems being interconnected via a communications network;

~~providing an identifier for each bookmark;~~

~~the search engine receiving search term and identifier information identifying a computer system;~~

~~the search engine searching a database using the search term and also searching websites associated with the bookmarks; and~~

~~the search engine providing results of searching the database and the websites to an identified computer system.~~

a user inputting a search term into the user computer system that specifies any websites associated with the bookmarks to be searched;

the search engine receiving the search term and accessing the bookmarks to obtain identifiers for the websites associated with the bookmarks and providing search results to the user computer system; and

the user computer system displaying the search results.

2.   (Currently Amended) The method of claim 1, further comprising:

the search engine providing results of the searching to ~~one of~~ the ~~first system and a third~~ user computer system.

4

3.   (Currently Amended) The method of claim 1, further comprising:

the search engine providing an advertisement to be displayed on the second system. using a uniform resource locator (URL) to access the websites.

4.   (Currently Amended) The method of claim 3, further comprising:

the search engine using the search term and information from the identifiers to select the advertisement. receiving the search term and an identifier that identifies the second computer system from the user computer system.

5.   (Cancelled).

6.   (Cancelled).

7.   (Currently Amended) The method of claim [[1]]4, further comprising:

accessing a file that includes the bookmarks; and

creating the identifier in response to accessing the file.

8.   (Currently Amended) An information handling system comprising:

a first system including bookmarks;

a second system including a search engine;

a search term provided to the search engine user system, each of the systems being interconnected via a communications network;

identifier and search term information being provided to the search engine;

a database being searched by the search engine using the search term;

a website associated with the bookmarks being searched by the search engine; and

results of searching the database and the websites being provided to an identified computer system by the search engine.

a search term input into the user system by a user that specifies any

websites associated by the bookmarks to be searched;

the search term being received by the search engine which accesses the

bookmarks to obtain identifiers for the websites associated with the bookmarks

and provides search results to the user system; and

means in the user system to display the search results.

9.   (Cancelled).

10.   (Currently Amended) The system of claim 8, further comprising:

a result of the searching being provided by the search engine to one of the

first system and a third system user computer system.

11.   (Currently Amended) The system of claim 8, further comprising:

an advertisement being displayed on the second system. the websites

being accessed using a uniform resource locator (URL).

12.   (Cancelled).

13.   (Cancelled).

14.   (Currently Amended) The system of claim 11, further comprising:

information from the identifiers being used to select the advertisement. the

second computer system being identified from the user computer system in

response to the search engine receiving the search term and an identifier.

15.   (Currently Amended) The system of claim [[8]]11, further comprising:

the bookmarks being in a file; and

the identifier being created in response to the bookmark file being accessed.

16.   (Cancelled).

17.   (Cancelled).

18.   (Cancelled).

19.   (Cancelled).

20.   (Cancelled).

21.   (Cancelled).

22.   (Cancelled).
